MOTOR RETAIL

JCT 600 PDI CENTRE PORSCHE LEEDS

CLIENT:

JCT 600 (Properties) Ltd

PROJECT:

JCT 600 PDI Centre Porsche Leeds

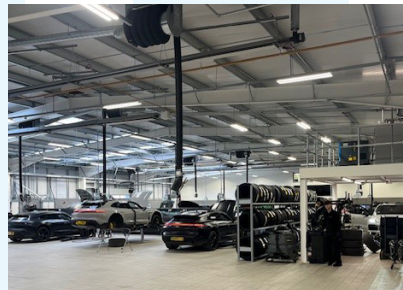

LOCATION:

The Boulevard, Holbeck, Leeds LS12 6FE

SIZE:

7,642 sq.ft.

A complete strip-out of the existing Porsche Pre-Delivery Inspection workshop consisting of the removal of the existing service ramps and MOT pits and new piled foundations to create a 3-bay extension to the existing facility.

The 3-bay extension provides a new mezzanine floor to form a large parts store, first-floor canteen and separate male and female WC's and showers.

The ground floor areas house a new workshop control office, parts area and tyre store, along with a new accessible WC.

The workshop now consists of 18 vehicle service lifts and 2 new MOT inspection bays, fully fitted bespoke tool cabinets, fully tiled floor and walls, new gas heating and LED lighting.

A Solar photovoltaic (PV) system has been added to the roof, and a new drive-through diagnostic bay has been created.
